

## Slideshow & Book Signing With the Author

Thursday, April 3, 7 p.m.  
Traditions Fair Trade  
300 5th Ave SW  
Olympia, WA  
[www.rideforclimate.org](http://www.rideforclimate.org)

**Free admission**

**DAVID KROODSMA** holds degrees in physics and environmental science from Stanford University, and works as an environmental consultant and data journalist. He lives with his wife, Lindsey, in San Francisco, California. Follow his continuing journeys at [www.rideforclimate.org](http://www.rideforclimate.org).

Join author and climate researcher **David Kroodsma** for a slideshow of his two-year, 21,000-mile bicycle journey across North and South America.

After finishing a master's degree in climate science and working in a research lab, David set out on a solo bicycle journey from California to the southern tip of South America. As he traveled, he gave talks on climate change, appeared in international media, and researched the effects of climate change on the places he visited. He followed this trip with a similar ride across the U.S.

The slideshow shares the best photos and videos from 21,000 miles of riding, and David relates the unique insights gained from his journey. Visit [www.rideforclimate.org](http://www.rideforclimate.org) to learn more.

"This is the kind of adventure we need more of—someone actually taking what they know and carrying it out to the people who need to hear it. Pedaling a bike, and peddling the truth about the most important issue of our time." —Bill McKibben, 350.org

"When scientist David Kroodsma talks about global warming, people listen—because he's on a bike." —*Bicycling Magazine*
